Housing Bubble in China?

Ratio of House Prices to Annual Income

Sources: Global Financial Stability Report: The Quest for Lasting Stability, IMF, April 2012

Cantillon Effect* Applied: Fed's „*Wealth Effect*“ only for the Richest

* The Cantillon effect describes the fact that newly created money is neither distributed evenly nor simultaneously in the population. That means that users of money partly profit from rising prices, and partly suffer from them. This results in a transfer of wealth, resp. a hidden tax, from later receivers to earlier receivers of new money.

APPENDIX

Why Incrementum?

Incrementum is the Latin word for:

- advancement
- expansion
- growth
- development
- seed
- offspring

About Incrementum AG

- ▶ Incrementum AG is an owner-managed asset manager & wealth manager based in the Principality of Liechtenstein. Our business focus is the management of investment funds that we believe to be unique.
- ▶ We evaluate all our investments not only in perspective of the global economy but in context of the current state of the global monetary regime. This enables us to gather what we consider ***a truly holistic view*** of the state of financial markets. A ***deep understanding of monetary history***, out of the box thinking and prudent research enables our clients to prosper in this difficult market environment.
- ▶ We believe our investment team offers a distinct skillset which has proven to be extremely valuable for us as investors in these uncertain markets. Among our partners are experts within the fields of:
 - ▶ Asset Allocation
 - ▶ Fundamental Bottom Up Research
 - ▶ Precious Metals
- ▶ Our boutique approach allows us to combine unconventional thinking with state of the art asset management wisdom. Our independence empowers us to communicate unbiased and our flexibility enables us to respond to evolving markets rapidly.
- ▶ Our intention is to deliver a selected range of investment funds, which we believe are able to grow ***incrementally*** also during times of increasing economic challenges.

About Incrementum AG

- ▶ Incrementum AG Liechtenstein is an asset management company founded in 2013 in Vaduz, Liechtenstein. As **independence** is a cornerstone of our philosophy, the company is one hundred percent owned by its partners. There are **no affiliations to any banking institutions**, which enables us to implement our investment strategies autonomously. As a boutique with lean hierarchies, we are able to execute our strategies swiftly and respond to regime changes flexibly. Our partners practice what they preach. Therefore we are invested in each of the funds we manage.
- ▶ The partners of Incrementum AG are highly qualified and **have over 140 years of combined banking experience**. Prior to joining the company the partners held positions within UBS, Dresdner Bank, Lombard Odier, Darier Hentsch & Cie., Cantrade Private Bank, PBS Private Bank, Bank Leu, Pictet & Cie., Bank Sal. Oppenheim, Merrill Lynch, Raiffeisen Capital Management, Erste Group and Société Générale.

Our 'Austrian' View

'An economic school of thought that originated in Vienna during the late 19th century with the works of Carl Menger. The Austrian school is set apart by its belief that the workings of the broad economy are the sum of smaller individual decisions and actions, which are based on laws that can be deduced by rational logical methods, unlike the Chicago school and other theories that look to surmise the future from historical abstracts, often using broad statistical aggregates.'

Investopedia on the Austrian School of Economics

Central view points of the Austrian School of Economics:

- ▶ Money is not neutral
- ▶ Inflation is the increase in the supply of money and credit
- ▶ Inflation is a harmful policy and causes a transfer of wealth (Cantillon Effect)
- ▶ Private ownership and property rights are essential
- ▶ Economics is all about individuals (subjectivism, methodological individualism)
- ▶ Actions have consequences – good and bad
- ▶ Bailout policies lead to moral hazards
- ▶ Prices signal scarcity and abundance and are essential for allocating resources efficiently
- ▶ Erroneous price signals set by central banks are the cause of boom and bust cycles
- ▶ Lowering interest rates leads to distortions in the economy by altering relative prices, which results in an artificial boom. Eventually, misallocations and malinvestment can no longer be supported and a 'bust' ensues in which these misallocations are worked out
- ▶ A **return to sound money** is necessary and advocated

The Relevance of the Austrian School for us at Incrementum

- ▶ The majority of Western nations have amassed **unsustainable debt levels**. Politicians now are faced with the choice of rigid austerity measures, massive tax hikes, national bankruptcy, or extensive financial repression.
- ▶ By a process of elimination we can quickly find the supposed magic formula, given that the political implications of rigid austerity measures and drastic tax hikes are largely unpopular and squarely at odds with the goal of getting re-elected. On top of that, drastic austerity measures tend to result in social upheaval. According to Bridgewater the frequency of protests and social unrest increases sharply as soon as annual public spending is cut by more than 3% of GDP.
- ▶ Therefore, we believe that **financial repression** will continue to crop up in many shapes and sizes over the coming years. However, the long-term costs of the lack in efforts made towards consolidating national finances are substantial. While low bond yields in the short run suggest that the saving measures are on course, one has to bear in mind that this has mainly been achieved by market interventions.
- ▶ The crucial question of whether price **inflation or deflation** will be the determining environment in the coming years remains unanswered. The fear of deflation as manifested, for example, in numerous essays and speeches by Ben Bernanke (e.g. 'Deflation: Making Sure 'It' Doesn't Happen Here') argues very much in favour of further interventions in increasing magnitude. The natural shakeout during a deflationary recession will probably be avoided at all costs and **even more aggressive monetary expansion programmes will be launched**.
- ▶ Most of the global financial savings are currently invested in sovereign debt instruments. With yields at record lows and debt at record highs evidence is increasing, that this could be the largest bubble in financial history. We believe that **a significant revaluation of assets is looming and a great transfer of wealth will be the consequence**.
- ▶ We will gladly alter our stance as soon as signs of sounder financial and monetary policies can be discerned. As a boutique with lean hierarchies, we are able to execute our strategies swiftly and respond to regime changes flexibly.
- ▶ We sincerely believe that the Austrian School of Economics provides us with the **appropriate intellectual foundation** especially during this demanding financial and economic environment.

'The key is not to predict the future, but to be prepared for it.'
Pericles
